Linking People Together

HLI-ET2

Key Features and Benefits

- Ethernet LAN network interface module
- Can link up to 3 HelixNet Main Stations together
- Can be used to connect HelixNet remote stations, speaker stations and HXII-BP beltpacks to HelixNet Main Stations
- All labels will transfer across the linked systems
- Two RJ-45 connectors per module

HelixNet is a digital partyline system with up to 24 channels of full-duplex audio and program audio over any shielded twisted-pair cable.

Description

The HLI-ET2 is an Ethernet LAN network interface module that enables a dual LAN interface to link to other HMS-4X main stations or to connect to HRM-4X remote stations or HKB-2X speaker stations. It fits within one of the three rear panel interface slots of an HMS-4X main station. Two RJ-45 connectors on the module can be used for linking up to 3 HMS-4X main stations together to form one complete system. In addition, the module allows connection of HRM-4X remote stations , HKB-2X speaker stations, and HXII-BP beltpacks via Ethernet. Once connected, the HelixNet stations share all digital partyline, Program Audio signals and any or all 2- or 4-wire interface audio. All channel labels will be transferred across the system automatically. Ethernet and Fiber modules can be mixed

Pin	Name	Function
1	TX+	Transmit data (+)
2	TX-	Transmit data (-)
3	RX+	Receive data (+)
4	N/C	Not Connected
